For the past 15 years, Sweatlodge has been organising 1000 to 1500 capacity techno parties where the audience is expected to be costumed. From the very beginning, the aim of Sweatlodge is to mix performance and party inside and outside the circus tent. A new series of events has just begun, with a project that offers a journey through the night to our audience, through specific set designs, stagings and performances.

The idea of a journey, or of a path, reminded us our labyrinthine lives and parties, designed as a series of happy accidents derailing our trajectories. The audience dances, then loses itself, becomes unstable, more fluid, is deconditionned, unpacked, allowed to flow across the party. Our guideline : stay rough.

During three years, this new project will grow and change with each event/laboratory, and as a result, a final version will be presented in september 2020. The staging is directed by several artists who will individually and collectively assimilate one of the moments of these nights.

## SINCE 2018

Tanguy MALIK BORDAGE - Grosse Théâtre

Lorca RENOUX - 100 Issues

## STARTING IN 2019

François JULIOT - G. Bistaki

## IN 2020
